

To Whom it may Concern:

I would like to voice my opinion that it would be very detrimental to me, but more especially to my community of El Paso Texas, if the FCC introduces LPFM and pre-empts stations like K-LOVE that might already be using that FM frequency.

K-LOVE radio is a big part of the Christian community where I live. We live in an area that has very little choices for Christian listeners. K-LOVE promotes strong family values, and gives young adults alternatives to music with lyrics that are less than ideal for ethical and moral reasons.

K-LOVE gives information for the local Christian community of El Paso, but also gives me information on the greater Christian community around the world. This gives us a connectedness that would not be here without K-LOVE and Christian Radio.

For the above reasons I implore you to not consider allowing LPRM services to pre-empt current programming from K-LOVE stations.

Thank you for this opportunity to give you my opinion.

Sincerely,

Tena Spitsberg
